Shapley-Shubik Simulation Tool

Introduction:

This simulation tool is designed to analyze the Shapley-Shubik Power Index in the context of electoral outcomes. It provides insights into the influence of individual states on coalition dynamics.

Prerequisites:

Ensure you have Python 3 installed on your system.

Usage:

Run the simulation tool using the following command:

```
python3 shabley_gui.py
```

This will launch the graphical user interface (GUI) for the Shapley-Shubik simulation.

Open the Lok Sabha option on the bottom navigation bar and enter the number of simulations to run.
